SUMMARY

For two decades I've built products and led design across enterprise SaaS, fintech, and consumer tech, from high-volume consumer growth funnels to complex technical platforms. Most recently I directed the product design function and UX strategy for a B2B analytics platform, shaping product direction through its shift to product-led growth and AI-native transformation. My work centers on building teams and conditions that make high-quality product work repeatable: people development, clear strategy, rigorous operating practices, and a disciplined adoption of AI that strengthens design judgment while compressing the delivery cycle. My perspective is anchored in behavioral psychology, systems thinking, and business strategy.

EXPERIENCE

Director, Product Design | 2021 - 2026

Sisense | B2B2B/C, BI & Embedded Analytics; 500+ employees

Led Product Design across the entire platform - analytics, embedded products, and a developer console - reporting to the CPTO. Built and led a multidisciplinary team across the US, Ukraine, and Israel, owning UX strategy, budget, and the operating model. Contributed to product strategy and roadmap priorities through the Product steering committee.

- **Product & AI:** Directed design and guided product managers on the AI assistant from concept to release, defining features, workflows, and user control and oversight - so business users could answer their own data questions without waiting on an analyst.
- **Product vision:** Defined the long-term AI-native product vision and agentic capabilities, then prototyped it in code, turning a strategic concept into a working, explorable experience that leadership adopted as the platform's direction.
- **Growth & customer insight:** Led design for the self-service trial and a platform-wide information architecture overhaul, so new users could reach value without a sales-led path; introduced behavioral analytics the company adopted for its KPIs; and established the research practice with an external team, directing its methodology and centralizing findings for reuse across Product and Engineering.
- **Organization & team:** Rebuilt the design function through successive restructurings, keeping the team motivated through the change and improving productivity, while developing designers toward broader ownership and cross-functional judgment. Moved the practice to AI-assisted design workflows, working through early resistance until it became standard.
- **Operating model:** Developed an AI-era Product Development Lifecycle framework, aimed at the handoff queues between disciplines and built on cross-functional production with discipline-owned approvals and decisions. Adopted as the standing operating model.
- **Design & engineering:** Drove the build of an internal front-end generation framework over the design system, making its auto-generated component library the source of truth for engineering. The system then composed whole user flows, with a model keeping output resolved to system patterns.

Product Design Lead | 2020 - 2021

Sisense

Led UX/UI design and mentored designers across the platform's most complex product areas, turning dense analytical workflows into experiences non-specialists could use.

- Directed the build of the design system and its component-and-style library, establishing a shared foundation across product teams.

Senior Product Designer | 2018 - 2020

WalkMe | B2B2C, Digital Adoption Platform; 500+ employees

Owned end-to-end UX/UI design of WalkMe Mobile, enabling onboarding and feature adoption inside other companies' apps, then led major improvements to the Core product.

- Redesigned the WYSIWYG editor, increasing user workflow efficiency by ~800% and establishing market leadership in flexibility and functionality.
- Designed a further-optimized editor that more than doubled productivity for users with limited technical and design skills.

Founding Product Designer & Product Manager | 2015 - 2018

Smartlend | B2B, B2C, Fin-Tech; 20+ employees

Owned the full product lifecycle of the company's B2B and B2C products, from 0 to 1 - discovery, requirements and PRDs, prioritization, UX/UI design, and launch - partnering with Business Development, the CTO, and Engineering.

- Shipped a POS-terminal and mobile application that users with limited technical experience could adopt with minimal retraining.
- Reworked a critical stage of the user journey, sharply increasing conversion and cutting abandonment.

Design Team Leader, CRO Manager | 2012 - 2015

Toyga | B2C, Fin-Tech; 200+ employees

Led the design team and oversaw localization across tens of languages, including right-to-left.

- Design work I led generated 400k+ leads and ~\$12M in revenue, roughly 40% of annual revenue.
- Ran conversion optimization across consumer acquisition funnels, using continuous A/B testing to guide design decisions and deliver consistent, substantial gains.

Earlier career: web, brand, and UI design across agencies and independent practice.

SKILLS

Leadership & Strategy: UX Strategy, Product Strategy, Roadmap Planning & Prioritization (RICE, Kano, adapted frameworks), OKRs, Product Discovery & PRDs, 0-to-1 Product Development, Design Operations & Operating Models, Team Building, Hiring & Coaching, Cross-functional Leadership, Stakeholder Management, Design Critique & Quality Review

Domain & Technology: AI / Generative AI (in product & process), AI Agents & Agentic Workflows, Conversational UX, Human-in-the-Loop & Trust Design, Product-Led Growth (PLG), Enterprise SaaS, Consumer Products, Embedded & Multi-tenant Products, BI & Analytics

Systems & Practice: Design Systems, Design Tokens & Component Libraries, Information Architecture, Interaction Design, Accessibility, Internationalization & RTL, Agile, Design-Engineering Collaboration, Figma, AI-Assisted Prototyping (Cursor, Claude Code, Claude Design)

Research & Optimization: User Research, Customer Interviews, Usability Testing, Concept Validation, A/B Testing & Experimentation, Behavioral & Product Analytics, Conversion Optimization (CRO)

EDUCATION

MSc in Biotechnology, State University of Moldova

Machine Learning, University of Washington (Coursera), 2018

Introduction to Entrepreneurship for IT Projects, Microsoft Academy, 2015

LANGUAGES

English (Full proficiency), Hebrew (Full proficiency), Russian (Native), Romanian (Intermediate)
