

# Victor Kaidan

## PRODUCT & DESIGN LEADER

+972 54 242 1127 | [victor.kaidan@gmail.com](mailto:victor.kaidan@gmail.com) | [linkedin.com/in/kaidan](https://linkedin.com/in/kaidan) | [kaidanv.com](https://kaidanv.com)

## SUMMARY

I've led the Design and Product sides of large-scale products, most recently defining the product design function and UX strategy of a B2B analytics platform through its shift to a PLG model and AI-native transformation: defining the vision, planning agentic AI capabilities across the platform, and contributing to roadmap planning and prioritization. My focus is the seam where AI is reshaping how Product, Design, and Engineering work - collapsing the sequential handoffs between them and compressing the delivery cycle. Background spans two decades in enterprise SaaS, fintech, and consumer tech, also anchored by roots in psychology, marketing, and a methodological mindset.

## EXPERIENCE

### Director, Product Design | 2021 - 2026

Sisense | B2B2B/C, BI & Embedded Analytics; 500+ employees

Led Product Design across every area of the product, reporting to the CPTO. Owned the design function end to end - operating model, hiring, budget, and design strategy. Served on the Product steering committee, contributing to product strategy, roadmap planning, and prioritization. Led a multidisciplinary team covering UX/UI, research, and design systems, coaching designers toward broader ownership across product, business, and technical ground.

- Led design for the company's two defining shifts - a move to Product-Led Growth (PLG) and the integration of AI across the product - shipping a self-service Trial and leading a platform-wide information architecture overhaul.
- Defined the vision and product concept for the platform's AI-native transformation, planning agentic AI capabilities across the platform and setting direction for the product managers building on them.
- Shaped the AI assistant from concept to release, defining its feature and workflow design, what it can act on, and where users keep control of automated decisions.
- Prototyped the long-term product vision directly in code with AI, turning a strategic concept into a working, explorable experience that leadership adopted as the platform's direction.
- Directed the build of an internal front-end generation framework over the design system, with auto-generated components assembling entire functional user flows and a review model that keeps generated output resolved to system patterns.
- Developed a methodological framework for the modern Product Development Lifecycle, defining a new model for how Product, Design, and Engineering teams collaborate more efficiently and productively in the AI era.
- Led product design for a developer-first product line built around the platform's embedding SDK - an IDE-style console taking a developer from data source to working code.

### Lead Product Designer | 2020 - 2021

Sisense

- Led UX design for the platform's most complex product areas, turning dense analytical workflows into experiences non-specialists could use.
- Directed the build of the design system and its component-and-style library, establishing a shared foundation across product teams.

## Senior Product Designer | 2018 - 2020

WalkMe | B2B2C, Digital Adoption Platform; 500+ employees

- Owned end-to-end UX/UI design of the WalkMe Mobile platform, later leading major improvements to the Core product.
- Redesigned the WYSIWYG editor, increasing user workflow efficiency by ~800% and establishing market leadership in flexibility and functionality.
- Designed a further-optimized editor that more than doubled productivity for users with limited technical and design skills.

## Principal Product Designer & Product Manager | 2015 - 2018

Smartlend | B2B, B2C, Fin-Tech; 20+ employees

- Owned the full product lifecycle of the company's B2B and B2C products, 0 to 1 - discovery, requirements and PRDs, prioritization, and delivery through UX and UI design to launch - partnering with Business Development on one side and the CTO and Engineering on the other.
- Shipped a POS-terminal and mobile application that onboarded low-skilled users with minimal retraining.
- Reworked a critical stage of the user journey, sharply increasing conversion and cutting abandonment.

## Design Team Leader, CRO Manager | 2012 - 2015

Toyga | B2C, Fin-Tech; 200+ employees

- Led the design team, raising the performance KPIs of its creative output.
- Created high-converting designs that generated 400k+ leads and ~\$12M in revenue (~40% of annual revenue).
- Ran systematic A/B testing and conversion optimization across consumer acquisition funnels, using experiment data to drive design decisions and delivering consistent, substantial gains.

**Earlier career:** web, brand, and UI design across agencies and independent practice.

## SKILLS

**Leadership & Strategy:** UX Strategy, Product Strategy, Roadmap Planning & Prioritization (RICE, Kano, adapted frameworks), OKRs, Product Discovery & PRDs, 0-to-1 Product Development, Design Operations & Operating Models, Team Building & Hiring, Agile, Cross-functional Leadership

**Domain & Technology:** AI / Generative AI (in product & process), Agentic Workflows & AI Agents, Human-in-the-Loop & Trust Design, Product-Led Growth (PLG), Enterprise SaaS, BI & Analytics

**Systems & Practice:** Design Systems, Information Architecture, Interaction Design, Design-Engineering Collaboration, Design Thinking, User-Centered Design (UCD)

**Research & Optimization:** User Research, Customer Interviews, Usability Testing, Concept Validation, A/B Testing & Experimentation, Behavioral & Product Analytics, Conversion Optimization (CRO)

## EDUCATION

MSc in Biotechnology, State University of Moldova

Machine Learning, University of Washington (Coursera), 2018

Introduction to Entrepreneurship for IT Projects, Microsoft Academy, 2015

## LANGUAGES

English (Full proficiency), Hebrew (Full proficiency), Russian (Native), Romanian (Intermediate)
