Attention

* (ClickTale data collected for Russian version of LP)

Calculated for visitors with engagement rate higher than 60 seconds.

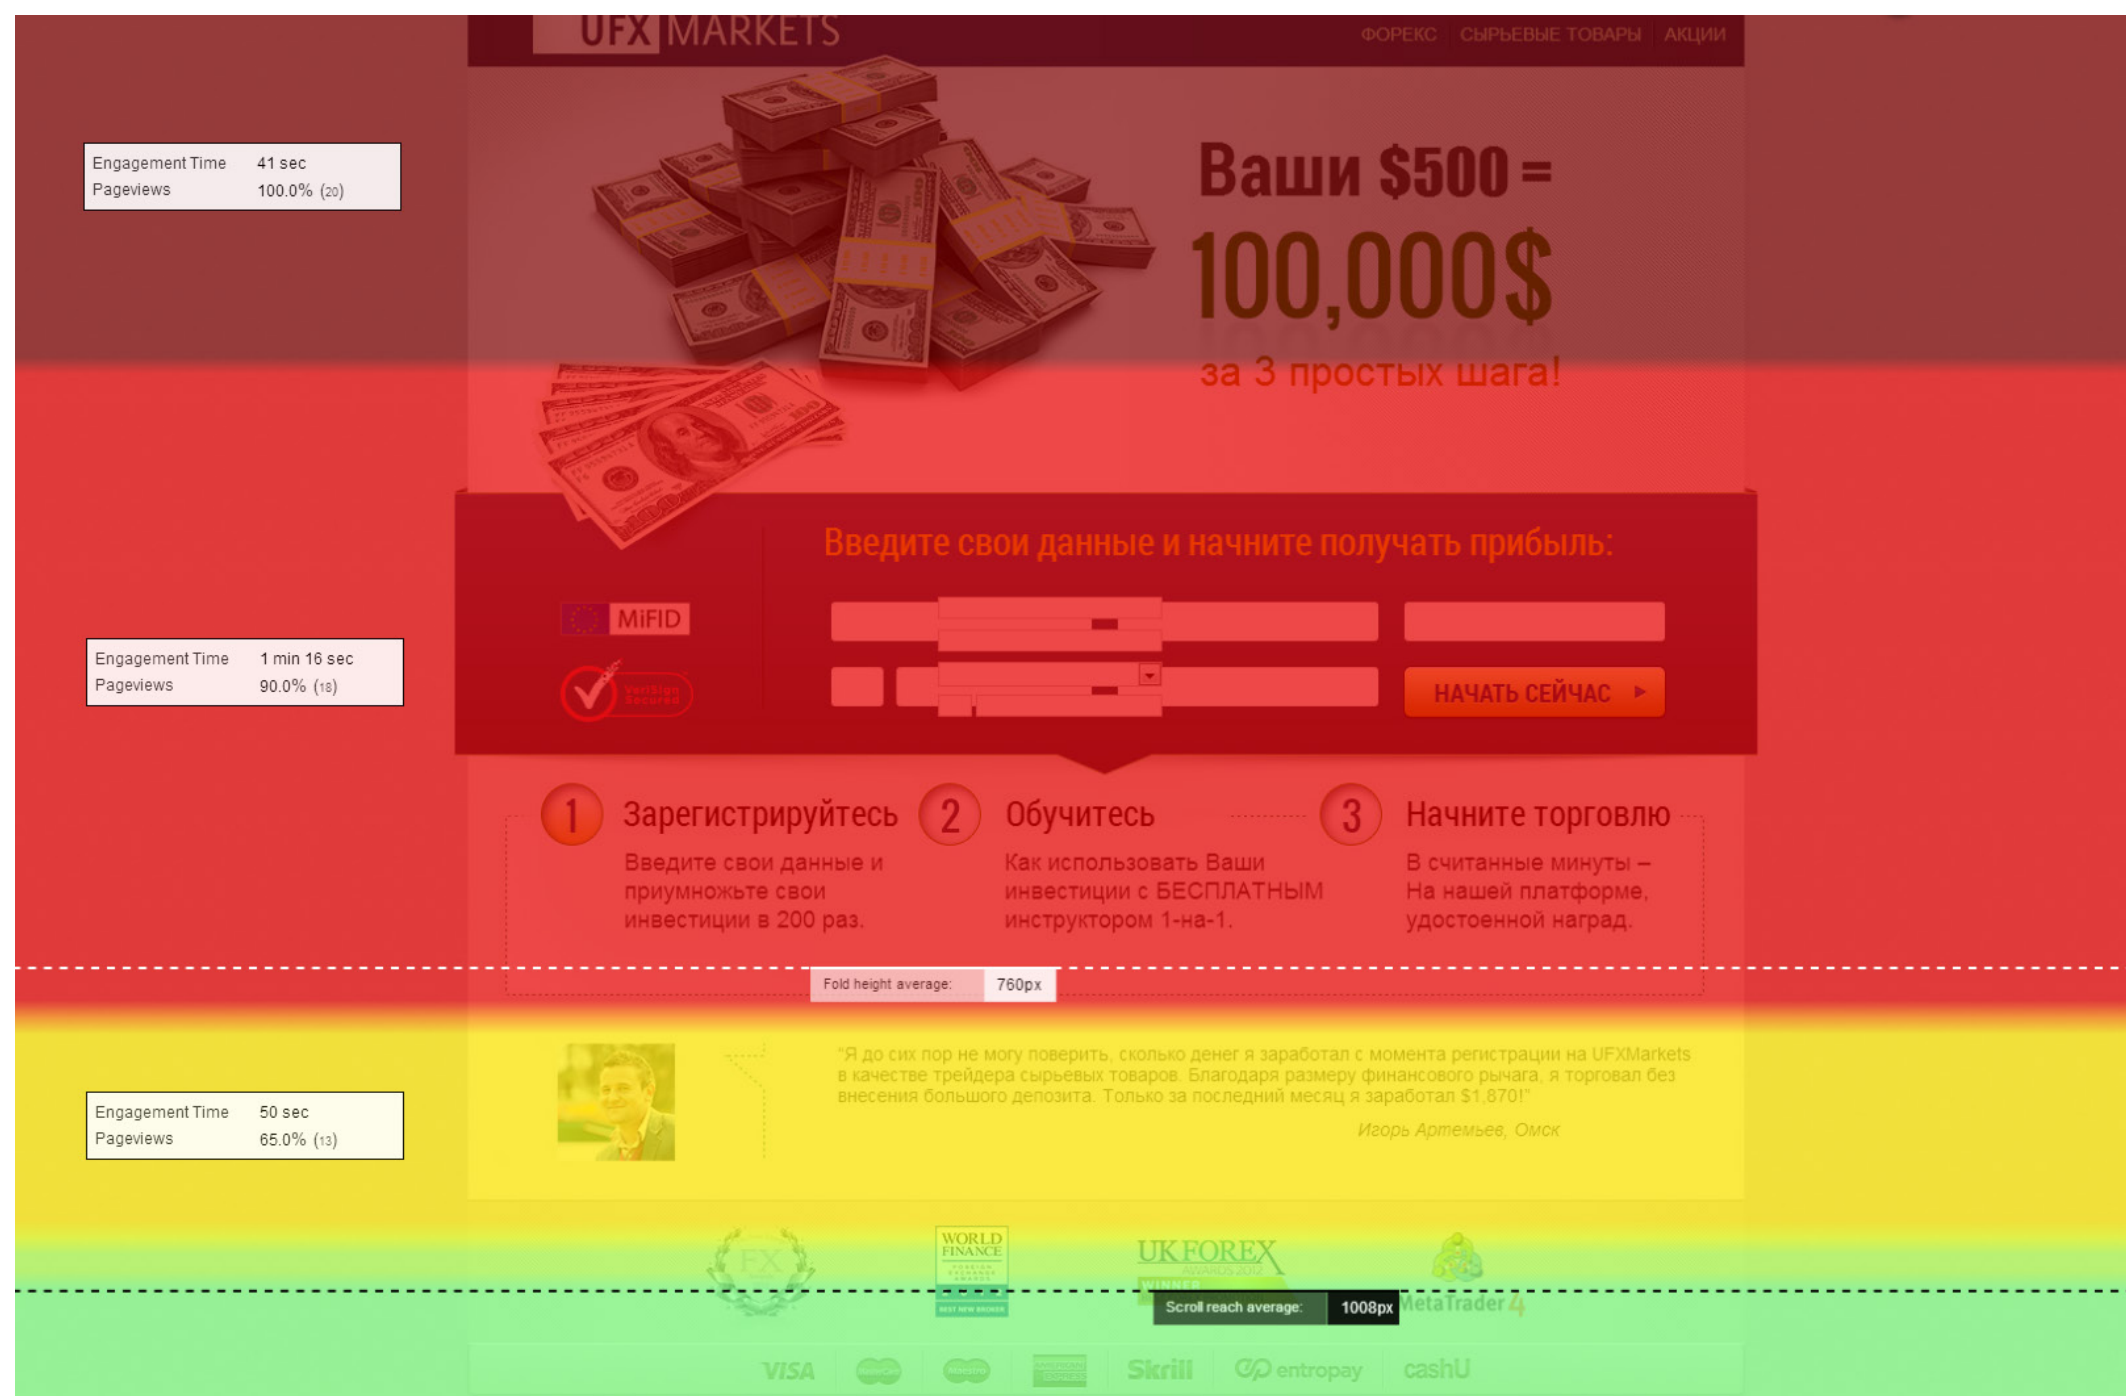

The content area (bullets and testimonial) receives the biggest part of attention.

Scroll Reach

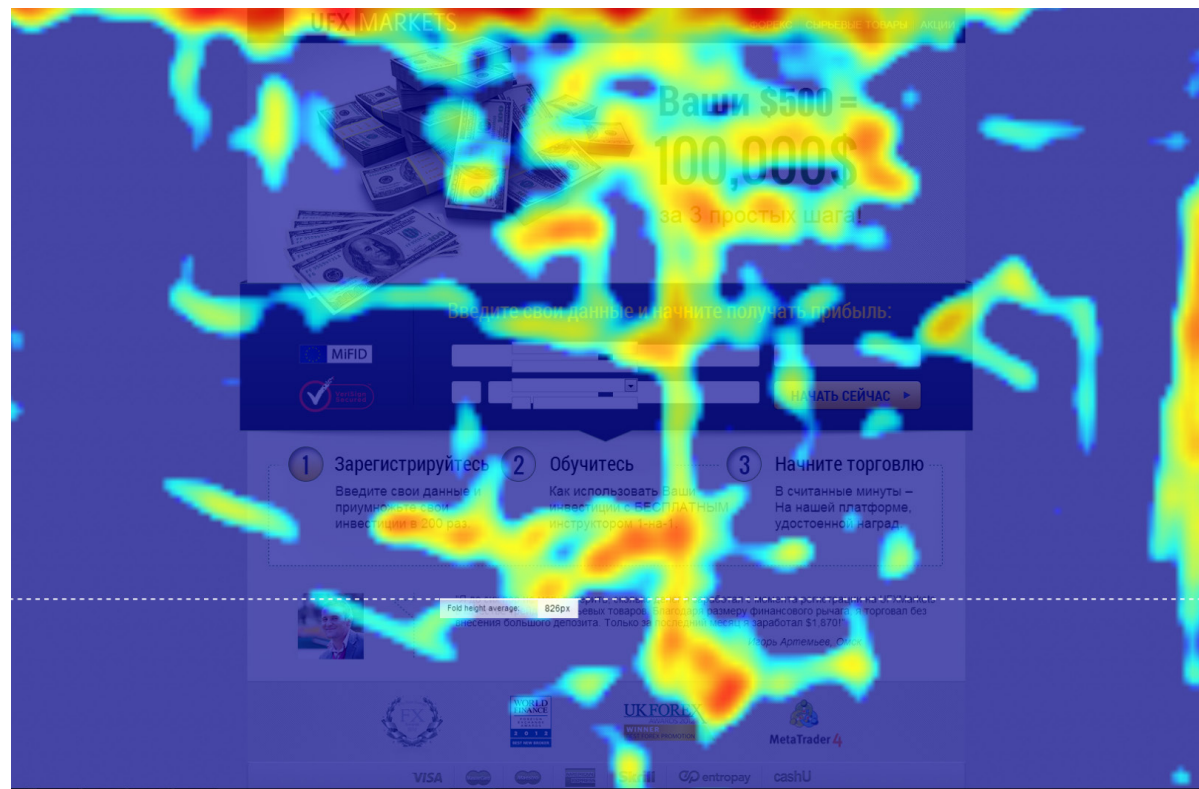

Calculated for visitors with engagement rate higher than 60 seconds.

Both form and bullets receive the similar scroll-reach rate and are above the average fold.

Mouse Hover

Visitors with engagement rate less than 60 seconds.

Visitors with engagement rate higher than 60 seconds.

Concentration on content is noticeable for more engaged users.

User Experience

Sequence of user actions on the LP

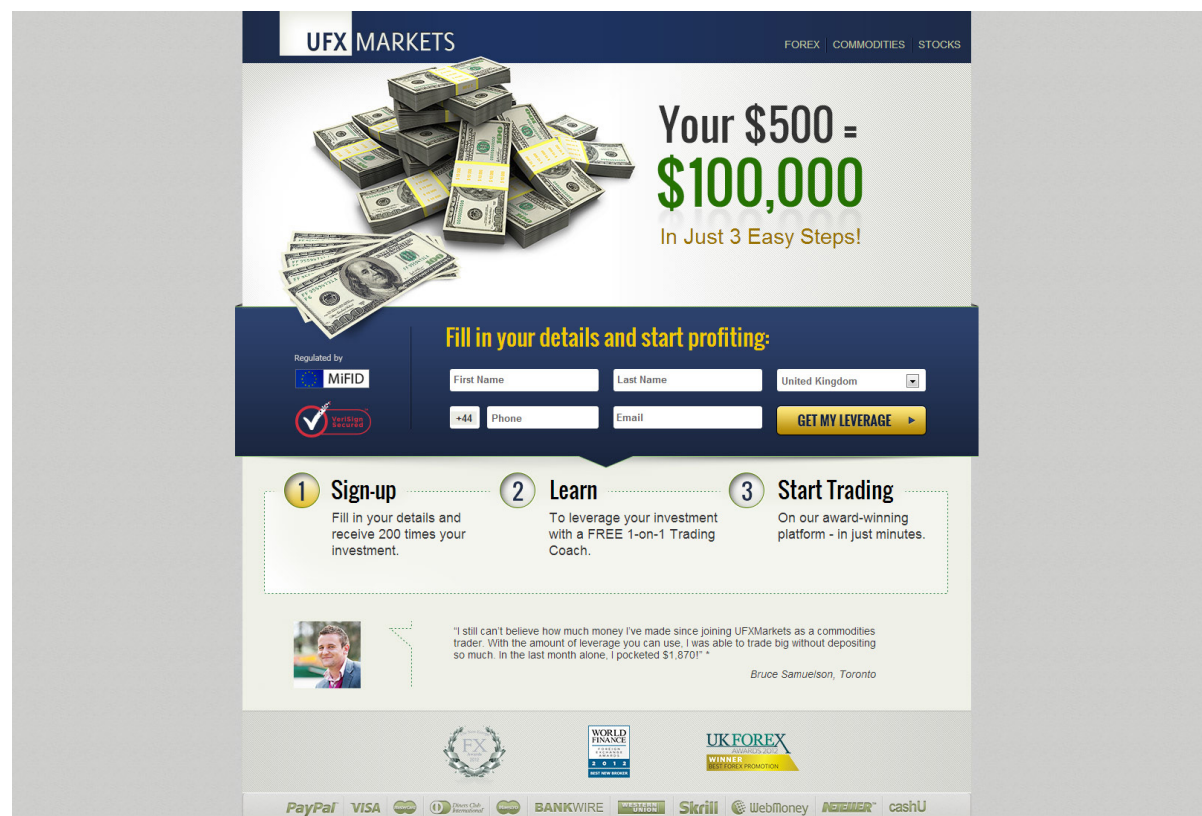

HYPOTESIS

Swapping the places of registration form and the main content unit (bullets) will provide:

1. Better and earlier readability of content, and thus prepare more visitors to become ready to register.
2. Easier sliding and a clearer sequence of actions on the page.

VARIATIONS TO BE TESTED

A (control)

B (experiment)

Test supposed to be carried out on English and Russian markets (separately) to obtain more reliable data
