OVERVIEW

A passionate UI / UX designer with a proven experience of creating elegant effective and efficient UX solutions, implemented in intuitive human-centered user interfaces.

Adept at design thinking methodology. Researched, prototyped and designed a range of mobile and web apps which demonstrated good performance with diverse audiences and conditions of use.

WORK EXPERIENCE

Principal Product Designer

2015 – present | “Smartlend” - Tel Aviv, Israel

(Technology-providing company in financial field, operating in USA and Philippines with a head office in Israel)

I have been responsible for the full cycle of user experience and product design for a range of the company's products (user research, interaction models and UX flows, wire-framing & prototyping, performance and usability testing, visual UI design).

- Developed UX/UI design of an application for POS terminals, which received an enthusiastic feedback from stakeholders and provided onboarding of “difficult” users with significant savings at retraining.
- Increased the conversion by 107%, reduced the bounce rate by -64% and improved users' engagement on a complex application form - a crucial stage of the user flow.
- Designed a number of dashboards and business apps that allowed managers to track KPIs on-the-go with significant time savings.

Design Team Leader, CRO Manager

2012 – 2015 | “Toyga” - Tel Aviv, Israel

(International online trading company operated in Great Britain, Canada, EU, Australia, South Africa, UAE, China, and other countries)

Directed marketing and UI/UX design, conducted design research and Conversion Rate Optimization (CRO).

- Led the design team, guiding and training them through the design thinking methodologies, what improved KPIs of the creatives produced by the team.
- Created a range of high-converting designs, that generated over 400k of new users and about \$12M of the company's income.
- Conducted conversion optimization where achieved a 20% - 100% uplift in landing pages' conversion rate (up to 482%).
